[ABOUT ME](#)

[TEACHING MATERIALS](#)

---

Before moving to Seattle I lived in many places: City of Angels, Veracruz, Morelia, Guanajuato, I arrived in Seattle in the summer of the World cup in Germany. I've moved around so much that I lived the most in my life.

---

Here is the relevant Academic info about my credentials.

B.S. Mathematics

Universidad de Guanajuato

Mexico, 2001

---

M.S. Mathematics

UNAM

Mexico, 2003

---

Since my second year at Guanajuato I had lots of fun studying low-dimensional Topology, in particular manifolds by performing Dehn surgery along a knot. After my Master's degree I was adventurous towards a PhD, a degree that I did not complete.

Somehow the work I had completed so far was picked up by my Adviser and some collaborators have me listed as the co-author of a research paper in this area. There is a link [here](#) (published on the arxiv).
